

"DAVID EINSTEIN: A Forty-Year Survey – Paintings and Works on Paper"

One of the nice things about our digital world is that we can now see the work that goes into our frames. This is a major exhibition at the Michael Lord Gallery in California that I think will interest you.

The public is invited to attend an opening reception for the artist on Friday, March 4, from 6 to 8 pm. The exhibit continues through April 2, 2011.

A painter of landscapes, David Einstein prefers to work in an abstract vein that gives him the freedom to render nature subjectively. Along with his paintings, Einstein explores ink and brush mark making on handmade paper and ceramic surfaces. The gallery is concurrently publishing a landmark book illustrative of his outstanding career.

Metropolitan Studio Visit with Maarja Roth

We have been visiting customer studios for many years. We like to meet our customers in person and to find out about their work and help them with whatever framing issues they may have. In this new digital world we can take you with us. Maarja Roth primarily works on paper but likes all media including earth sculpture. Here is a video of our visit. Enjoy!
