

Billy Hassell "Lone Star Wild" at Davis Gallery in Austin Texas

My work is a symbolic and narrative response to nature and seeks a balance between realism and abstraction. My primary subject matter has been the flora and fauna of Texas and my influences include Mexican and American folk art, 19th and 20th Century Japanese woodblock prints, natural history, field guides and botanical studies. Over the years I have become increasingly concerned and involved with environmental issues and have received commissions from Audubon Texas, the Texas Nature Conservancy and the Texas Parks and Wildlife Foundation to produce color etchings and color lithographs featuring the flora and fauna of Texas that highlight those organizations' conservation efforts around the state and the Gulf Coast.
